

# **Xylem Product Security Advisory**

# Third Party – OpenSSL Vulnerabilities (v2.0)

## November 4, 2022 (November 8, 2022)

### **Overview**

Two vulnerabilities were released by the OpenSSL Project, which affect OpenSSL software that may be used in select Xylem products.

Xylem is in the process of identifying impacted products along with a remediation approach for affected customers. The status of the affected products is listed within this advisory below.

# **Vulnerability Details**

CVE ID: CVE-2022-3602 (CVSS Score: 7.5 - High)

According to the OpenSSL advisory, the vulnerability could allow a buffer overflow attack resulting in a crash (causing denial of service) on vulnerable systems.

CVE ID: CVE-2022-3786 (CVSS Score: 7.5 - High)

According to the OpenSSL advisory, the vulnerability could allow a buffer overflow attack resulting in a crash (causing denial of service) or potentially remote code execution on vulnerable systems.

#### **Affected Products**

Xylem is currently investigating affected products and will update this table as more information becomes available.

| Affected Products           | Status     |
|-----------------------------|------------|
| Water Loss Management (WLM) | Remediated |
|                             |            |

<sup>\*</sup>Xylem products not listed in the above table are not impacted.

# **Mitigation**

In alignment with the guidance from the OpenSSL Project, Xylem strongly recommends affected users take the following actions:

• Upgrade to OpenSSL version 3.0.7
