## HYPACK 2019 USA Training Event Announcement

By Christine Roca

We are excited to announce that the HYPACK® 2019 USA Training Event will be held in Corpus Christi, TX from January 8th- 11th. The Omni Corpus Christi Hotel will provide accommodations and host our annual event.

During this event, we will reveal the newest version of our software, HYPACK® 2019. Attendees will get first-hand knowledge and training on all the new updates and improvements this release has to offer.

The HYPACK® USA Training Event is an essential, low-cost method to receive comprehensive instruction in HYPACK®, DREDGEPACK®, and HYSWEEP® software. This training is beneficial to all as we provide a general training session for those who are just beginning to use HYPACK® or those who wish to have a refresher.

There are also expert sessions for one who wishes to receive more in-depth training on a particular subject. If you need help with an individual issue or question, one-on-one sessions with our technicians and programmers are available throughout the event.

Whether you are looking to move into the world of multibeam, or you are interested in purchasing side scan sonar, you will find the industry's leading companies exhibiting at the HYPACK® 2019 Training Event. Those interested in attending will be able to register and find event information on our website at [www.hypack.com](http://www.hypack.com) . If you have any questions, please contact Christine or Lourdes at [sales@hypack.com](mailto:sales@hypack.com) or call 860 635-1500.
