

## SAVE THE DATE | HYPACK 2026 Training Event

We are very excited to announce that the HYPACK 2026 Training Event will be held on January 12-15, 2026 at the Hilton New Orleans Riverside in New Orleans, Louisiana. Our annual hydrographic and dredging Training Event will be filled with training sessions showing off the newest features in HYPACK® 2026, user-presented case studies, training for novice and experienced users and more!

This training is a great opportunity to meet with our team and network with 30 of the industry's leading companies to learn about their products and services! We will also be offering one-on-one sessions for attendees to meet with our HYPACK certified trainers to assist on project specific questions. This is the perfect place to network with other people in the industry and meet with our HYPACK team in-person.

Make sure to save the date and stay tuned for more information and details. Registration will open this summer. We hope to see you there!
