Marine Application Notes:

Washdown -

Used for on-demand spray to clean anchors, buoys, fishing areas, etc. Typically, the higher the flow and the higher the pressure the better. Sometimes used with a Y valve to serve a dual purpose of livewell circulation. Common accessories include strainers, trigger nozzles, hoses, and deck mount fittings. Sometimes plumbed off of the livewell inlet to reduce number of thru-hull fittings.

Freshwater Delivery Pumps -

Installed to provide on-demand flow and pressure of freshwater to galleys, showers, washing machines, etc. Typical rule of thumb for sizing is 1 GPM per outlet. 40-60 psi (2.8 - 4.1 Bar) options provide similar pressure to that in a home on land. These pumps are equipped with a bypass which enables smoother flow and decreases cycling. Common accessories include strainers, water pressure inlet regulators, and accumulator tanks.

Shower-Drain/Livewell/General Purpose -

These pumps are configured without a pressure switch and are used for a variety of different purposes including removal of drain water from showers or the circulating/transfer of water in bait tanks.

Auxiliary Bilge/General Purpose -

Configured without a pressure switch and with elastomers specifically chosen to provide greater chemical compatibility and protection against fluids such as diesel fuel and motor oils.

Available Jabsco Options

In addition to the unit described in this datasheet Jabsco also offers the following configurations (will vary somewhat by region and model type) and options to suit above applications:

Voltages:	12 & 24 VDC options
Flowrate Range:	1 - 6 GPM (3.8 - 22.7 LPM)
Switch Setting Range:	25 - 70 PSI (1.7 - 4.8 Bar)
Pump Configurations:	Washdown ("kit" versions include a hose-coil) Freshwater Delivery Pumps Shower-Drain/Livewell/Bilge/General Purpose Pumps
OEM/Special Options:	We can configure specific product or kitting levels upon request. Minimum annual volume requirements will apply. Please send us an inquiry and we will evaluate.
