Titration

KARL FISCHER TITRATION (VOLUMETRIC AND COULOMETRIC)

SI Analytics

a xylem brand

5. Karl Fischer Titration – the water determining method

Experienced analyst may be unpleasantly reminded by the pyridine smell, when hearing the name Karl Fischer. However, modern reagents and most user-friendly analyzing instruments have eliminated the problem.

Nowadays all applications can be handled and processed very easily by using the coulometric and volumetric Karl Fischer titration instruments. Thanks to its selectivity and precision, the Karl Fischer titration very easily and accurately established as the most important method for determining water and humidity.

The basic principle of the water determination according to Karl Fischer (short: KF) is a reaction of iodine with water in an alcoholic solution with presence of sulfurous acid and a base.

With the volumetric method, the iodine can be accurately added through a piston burette, while the coulometric method works with iodine produced directly in the reaction vessel.

The difference between the volumetry and coulometry mainly exists in the manner of dosing the iodine for the titration. The illustration shows the different ways of dosing:

The different ways of dosing

TitroLine® 7500 KF

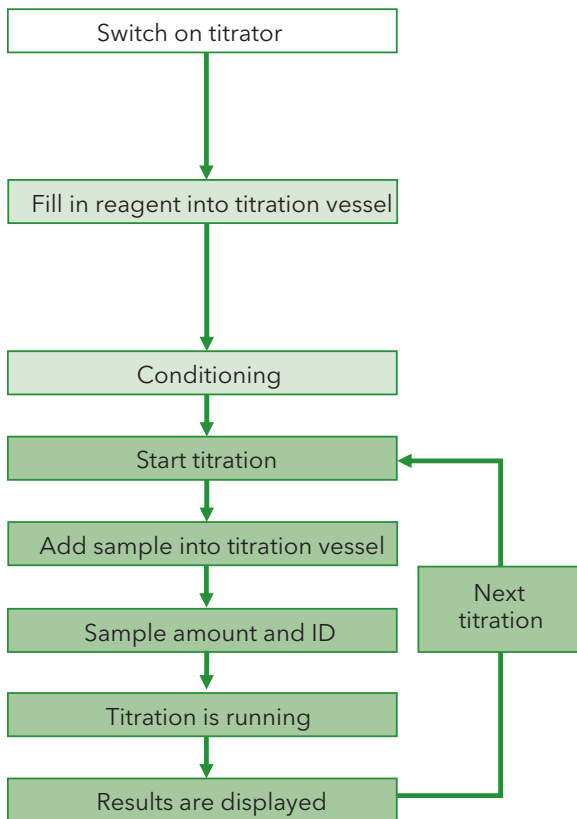

TitroLine® 7500 KF trace

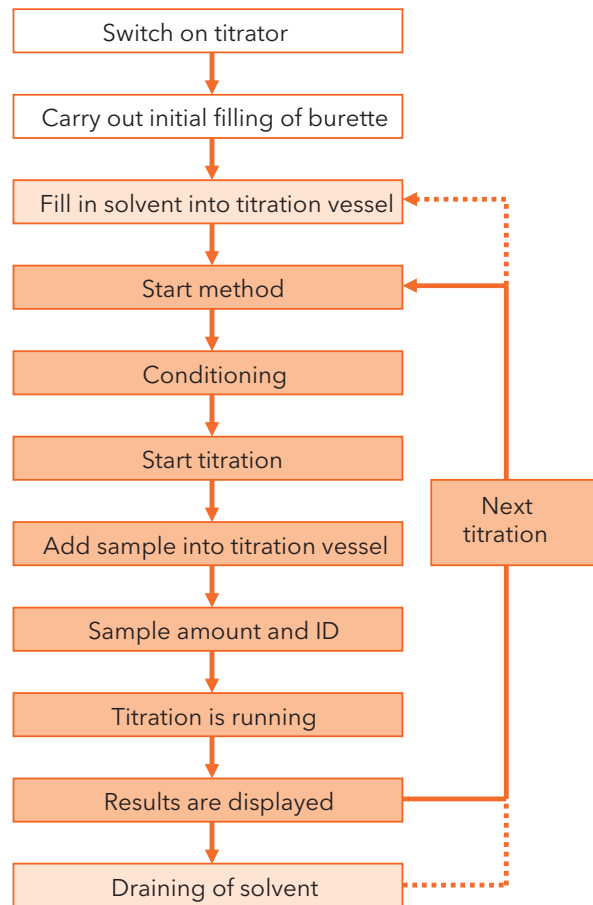

In practice small differences occur between the two methods which are displayed in the table. The advantages of the volumetry lie in the different types of sample addition and solvent variations, offering more flexible operation potentials. On the other hand, the

coulometry can handle lower detection limits, and the handling is even simpler. The compared work flow with coulometry and volumetry are shown with the following illustration. The clearly shorter and easier sequence is noticeable with the coulometry.

Coulometric KF titration

Volumetric KF titration

Comparison: Coulometric and volumetric Karl Fischer titration

Property	Coulometry	Volumetry
Water amount and sample amount	Small water amount Small sample amounts	Medium and large water amounts Adapted sample amount
Sample types	Liquid Gaseous Solid samples (with KF oven)	Solid Liquid
Sample addition and preparation	Direct with syringe Gas inlet with oven External extraction Solid samples are evaporated with an oven	Solid samples are added directly Sample preparation with homogenizer Working at higher temperature Direct with syringe
Working method	Very fast Very simple	Fast Simple
Working range (recommended)	µg range 10 µg up to 5 mg water	mg range 200 µg up to 50 mg water

TitroLine® 7500 KF and TitroLine® 7500 KF *trace* - Karl Fischer Titration made easy

You can't go wrong with the TitroLine® KF titrators

The TitroLine® 7500 KF is the volumetric generalist for a wide range of use and the TitroLine® 7500 KF *trace* is the specialist for low water contents. Both new titrators are to be characterized by the following features:

Benefits TitroLine® 7500 KF/KF *trace*

- ★ Fast, easy and precise
- ★ With standard methods for different applications (titer, blank value, one or two component reagents)
- ★ The addition of solvent and the extraction of the titrated sample are managed by the titration stand TM 235 KF (optional for TitroLine® 7500 KF *trace*)
- ★ Online display of curve and measurement drift during titration

TitroLine® 7500 KF *trace*

Live Titration curve

The online display of the measurement curve, measurement drift and titration solvent consumption (TitroLine® 7500 KF only) make accurate monitoring of the titration possible and one can determine any unwanted side reactions immediately.

TitroLine® 7500 KF

Automated KF Titration of all Samples with a Headspace Oven and Sample Changer

The headspace oven technique allows the separation of the water to be titrated from liquid, solid and pasty samples.

The sample is weighed in a small glass vessel with lid and septum (vial) and heated in the oven to a defined temperature. A dry air or nitrogen stream flows over a needle through the sample and takes the water with it in a gaseous state. The air or nitrogen together with the water vapor is passed into the titration vessel and the water is immediately titrated coulometrically with the TitroLine® 7500 KF trace.

The advantage of this method is the avoidance of direct contact of the sample with the solvent/analyte. The analyte is not contaminated and therefore more samples can be analysed than with direct analysis. As a rule, side reactions do not occur.

The complete system consists of the TO 7280 headspace oven, the coulometric titrator TitroLine® 7500 KF trace and the TW 7650 sample changer. The headspace oven can also be operated without the sample changer with the TitroLine® 7500 KF trace (with or without TitriSoft software, see next page).

Benefits of the headspace oven and the sample changer:

- ★ Semi automatic or fully automatic water determination
- ★ No contamination of the analyte, generator, and indicator electrodes
- ★ Application range from 35 to 280 °C

The headspace oven technique is suitable for the following samples:

- Pharmaceutical products
- Natural products
- Plastics
- Hygroscopic substances
- Freeze-dried products, e.g. lyophilisates
- Oils and lubricants, creams, pastes
- Viscous materials (bitumen, tar, sewage sludge)
- Powder and pellets
- Food
- Petrochemicals

The TO 7280 headspace oven for semi-automatic measuring

If you only have a few samples to measure per day, the semi-automatic headspace oven TO 7280 is the right choice.

Why semi-automatic? The user places the sample in the oven with the crimper and starts the method on the titrator or (optionally) on the TitrSoft software. Apart from entering the sample name and, if necessary, the initial weight, this is all that needs to be done in the next few minutes.

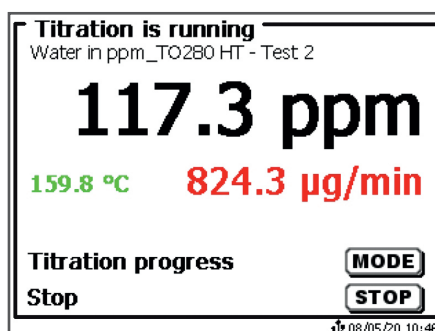

The needle head lowers automatically and the addition of air or nitrogen starts automatically as well. The desired bake-out temperature is stored in the method and is quickly reached.

Once the final criteria of the method are achieved, the result is displayed and documented and the next sample can be measured.

Benefits of the headspace oven:

- * Automatic lowering and raising of the needle head
- * Automatic switching on and off of the air/gas supply
- * Can be upgraded by the TW 7650 to a fully automatic system with sample changer

The TW 7650 sampler for fully automatic measuring

Advantages of the sample changer:

- * Can be upgraded to the TO 7280 oven at any time
- * Up to 49 samples can be measured. One position is reserved for the zero-vial to determine the start drift
- * The start drift can be determined before each sample
- * Each sample can be measured at a different temperature

If the number of samples exceeds 15-20/day, it is recommended to use the sample changer TW 7650.

The assembly of the sample changer and oven is within a minute done and immediately ready for use. There is no additional power supply unit or cable required. Power is supplied via the TO 7280.

The user places the sample vials in the changer and starts the method/work list with the TitrSoft software. The software TitrSoft is required when using the sample changer.

The sample plate rotates to the correct position; the changer head lowers onto the sample vial and sucks the lid tight with a pump. The changer arm moves to the headspace oven and places the sample vial in the corresponding opening.

The needle head lowers and the measurement begins as described on page 4. When the measurement is finished, the needle head lifts and the measured sample is transported back into the sample rack. Then the measurement continues with the next sample.

Technical Data TO 7280

Sample dosing:	Headspace vials (5 ml...)
Measuring range:	1 µg...100 mg absolute
Resolution:	0.1 µg
Reproducibility:	± 3 µg for 10...1000 µg, 0.3 % for > 1 mg
Temperature range:	35 °C ... 280 °C (isothermal)
Resolution:	1 °K
Power supply:	115 ... 230 V, 50/60 Hz
Power input:	250 W
Dimensions:	300 x 450 x 240 mm (W x H x D)
Weight:	7 kg
Ambient conditions:	Ambient temperature + 10 ... + 40 °C for operation and storage

Technical Data TM 235 TO

Housing material:	Polypropylene, plastic coated
Dimensions:	80 x 130 x 250 mm (W x H x D), height without stand rod, bottles, and titration vessel
Weight:	1.9 kg
Ambient conditions:	Ambient temperature + 10 ... + 40 °C for operation and storage
Power supply:	Via low-voltage connection (12 V) from TitroLine® 7500 KF trace titrator or power supply
Control:	Via USB port by TitroLine® 7500 KF trace titrator
Pump:	Integrated, for supplying the TO 7280 with air from the environment
Valve:	Automatically switching valve for air/nitrogen supply
Gas flow meter:	Adjustable between 50 - 500 ml/min

Technical Data TW 7650

Number of positions:	49 samples + 1 zero vial
Power supply:	Supply via TO 7280
Power input:	Supply via TO 7280
Dimensions:	420 x 450 x 460 mm (W x H x D) incl. TO 7280
Weight:	10 kg without/17 kg with TO 7280
Ambient conditions:	Ambient temperature + 10 ... + 40 °C for operation and storage

Ordering information accessories and spares

Type No.	Order No.	Description
TZ 3988	285227870	Vials, 5 ml with crimp caps and septa, 100 pcs
TZ 3989	285227880	Vials 5 ml, 100 pcs.

Ordering information TitroLine® 7500 KF/KF trace

Tye No.	Order No.	Description
TL 7500 KF trace M1	285220860	Module 1, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1752 without diaphragm + cable, magnetic stirrer TM 235, stand rod, titration vessel TZ 1751, Mikro-Doppelplatinelektrode KF 1150
TL 7500 KF trace M2	285220870	Module 2, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1752 without diaphragm + cable, TM 235 KF titration stand with built-in stirrer and pump, stand rod, titration vessel TZ 1754, micro double platin electrode KF
TL 7500 KF trace M3	285220880	Module 3, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1753 with diaphragm + cable, magnetic stirrer TM 235, stand rod, titration vessel TZ 1751, micro double platin electrode KF 1150
TL 7500 KF trace M4	285220890	Module 4, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1753 with diaphragm + connection cable, TM 235 KF titration stand with built-in stirrer and pump, stand rod, titration vessel TZ 1754, micro double platinum electrode KF 1150
TL 7500 KF trace M5	285221000	Module 5, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1752 without junction, connection cable, magnetic stirrer TM 235, stand rod, titration vessel TZ 1754, micro double platinum electrode KF 1150
TL 7500 KF trace M6	285227800	Module 6, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1752 without junction, connection cable LB 04 NN, TM 235 TO titration stand, stand rod, titration vessel TZ 1754, micro double platinum electrode KF 1150, connection cable TZ 3094
TL 7500 KF trace M6-TitriSoft Pharma	285227810	Module 6, coulometric KF titrator, scope of supply: basic titrator unit, generator electrode TZ 1752 without junction, connection cable LB 04 NN, TM 235 TO titration stand, stand rod, titration vessel TZ 1754, micro double platinum electrode KF 1150, connection cable TZ 3094 and TitriSoft 3.5 P

Ordering info TO 7280, TM 235 TO, TW 7650

Tye No.	Order No.	Description
TO 7280	285227820	For water determination according to Karl Fischer method. Maximum temperature 280 °C. Including power supply for 100 - 240 V
TW 7650	285227830	For the use with headspace oven TO 7280. Up to 50 vials (1 zero vial + 49 samples) with 5 ml size
TW 7650-TitriSoft	285227840	For the use with headspace oven TO 7280. Up to 50 vials (1 zero vial + 49 sample vials) with 5ml size. With TitriSoft 3.5 P
TO 7280 - TW 7650 set	285227850	Set includes KF headspace oven TO 7280 and the autosampler TW 7650. With TitriSoft 3.5 P
TM 235 TO	285227860	For TO 7280. Scope of supply: basic unit with two 100 ml DURAN®-bottles including threads, holder TZ 3992 for the bottles, PTFE tubes including screw connections, gas flow meter and holder, 100 vials and grimper, molecular sieve, power supply (110... 240 V)

Ordering information accessories and spares

Tye No.	Order No.	Description
TZ 3990	285227890	Crimp caps made of aluminum with opening, 10 mm diameter, septa made of silicone/PTFE, 100 pcs
TZ 3993	285227920	Connection tube including screw connections for connection headspace oven TO 7280 - titration vessel TZ 1754/gas flow meter
TZ 3994	285227930	Fittings set drying bottle for TM 235 TO, 2 x fittings and 2 x O-ring
TZ 3997	285227960	Tube set complete for connection headspace oven TO 7280 - TM 235 TO
TZ 1632	285227990	Dosing tip made out of glass for titration vessel TZ 1754
