Bell & Gossett transforms exhibit format for 2022 AHR Expo, showcases industry-leading HVAC and plumbing products

Xylem announces online AHR Product Showcase, B&G Recharging Lounge

MORTON GROVE, Ill. (Jan. 26, 2022) – Xylem, a leading global water technology company, announced its [AHR Bell & Gossett Product Showcase](#), a new landing page designed to engage HVAC professionals attending the 2022 AHR Expo on Jan. 31-Feb 2, in Las Vegas, which the company will not attend in person as planned due to pandemic health and safety concerns. The product showcase provides information on the latest Bell & Gossett products, solutions and technologies addressing modern HVAC and plumbing challenges in commercial buildings.

"Xylem's principal priority is the safety and well-being of our employees, partners and customers, so shifting to a virtual format is necessary given the health risks surrounding the ongoing COVID-19 pandemic," said Susan O'Grady, Director of Marketing, Building Services & Agriculture. "While we will not be there in person, Xylem is just as energized to take part in the show virtually."

The allotted exhibitor space on the expo floor – North Hall N9509 – will now serve as the B&G Recharging Lounge where AHR visitors can enjoy comfortable seating, recharge their devices and network at a safe, socially distanced space. The lounge will display QR codes navigating to the AHR Product Showcase, as well as a video showcasing key B&G products and messages that are part of the virtual showcase.

Featured products at the Bell & Gossett virtual booth

Product highlights of Bell & Gossett's AHR Product Showcase include the new ecocirc® 20-18/ecocirc+ 20-18 variable speed ECM smart circulator, CRS coalescing-style air and sediment separators, updated ESP-Systemwise selection tool, among other products. Visit the virtual [product showcase](#) to learn how B&G is addressing critical HVAC and plumbing challenges in commercial buildings.

- **Smart Circulators:** The ecocirc® 20-18/ecocirc+ 20-18 is the newest generation variable speed ECM smart circulator from Bell & Gossett. Designed for versatility and efficiency, the new ecocirc 20-18 suits a multitude of heating, cooling and potable water applications and can replace as many as 70 different pumps on the market today.
- **Outstanding Separation Capability:** The recently expanded CRS coalescing-style air and sediment separators product line – available for use in any HVAC system – helps break entrained air and suspended solids out of system fluid, efficiently removing these contaminants and improving heat transfer and energy efficiency.
- **Powerful Selection Software:** Experience the latest updates to ESP-Systemwise™, the comprehensive online selection tool that streamlines HVAC and plumbing system design. The new Systemwise Designer functionality allows engineers to select the most efficient systems in less time.
- **Smart, Connected Products:** Bell & Gossett's smart, connected products improve performance by providing operational efficiency and actionable data. The new optimize™ modular condition monitoring solution uses predictive analysis to identify potential problems with equipment before they occur.
- **Optimal Heat Transfer:** B&G's gasketed plate and frame heat exchangers feature an innovative plate design that uses less space and provides maximum efficiency and heat transfer – increasing thermal performance up to 20%.
- **Balanced Performance:** Bell & Gossett's hydronic balance valves are designed to provide field adjustability and efficiency for potable water and HVAC systems, ensuring precise control and optimum system flow.
- **Next-Generation Steam Products:** The new FPCe-1000 low water cut-off incorporates Bluetooth connectivity to monitor performance via a mobile device.

In lieu of in-person presentations meant for the AHR floor, Bell & Gossett will also host a product showcase webinar during which product managers will share the latest hydronic HVAC and plumbing innovations for commercial buildings. The webinar will take place at 2:00 p.m. EST on Wednesday, Feb. 23. Attendees can sign up for free at bellgossett.com/AHRExpo2022.
