

Emergency Services and Rental Coverage

LET US HELP KEEP YOUR CRITICAL ASSETS RUNNING WHILE MANAGING INCREASED CAPACITY REQUIREMENTS

The current environment puts a lot of stress on your teams, workflow and infrastructure. Ensuring sufficient ground coverage is a challenge all teams confront when trying to keep the lights-on for critical infrastructure.

Xylem can help you repair and operate critical water infrastructure assets and lend you the equipment you need to address capacity challenges

- Trained service engineers to carry out emergency repairs and maintenance
- Large rental fleet of electric submersible and diesel driven pumps, aeration/mixing equipment and UV/Ozone disinfection units available on short notice
- Emergency bypass pumping for critical pipelines in the water network
