

Minimize Exposure and Ensure Process Continuity with Remote Decision Support

WITH SMART MONITORING, EASILY CONNECT AND MONITOR PUMP STATIONS

The current environment puts a lot of stress on your team, workflow and infrastructure. Break-out teams and shift rotation reduce risk of the virus spreading among all of us, but also reduce efficiency.

With Smart Monitoring, easily connect and monitor pump stations

For Operations Managers of Wastewater Networks who desire fewer unexpected disturbances, Total Care Cloud presents a digital service to provide online operational status and early warnings of disturbances.

- Quickly connect to wastewater lift stations and other equipment
- Focus efforts where real maintenance needs exist
- Reduce the need for crews to visit pump stations for status checks
