

Dri-Prime add on solutions for site applications. **Next-level rental.**

At Xylem we rent out more than just pumps and treatment systems. We offer world-class expertise to provide you with cost-effective, reliable and innovative full-service solutions for even the most complex applications. Careful preparation makes all the difference:

Dri-Prime add on rental

Our Flygt Submersible Pumps can now be hired/rented and equipped with our state-of-the-art Dri-Prime rental add-on kit, enabling seamless operation in above ground, multi pump suction lift applications. All powered by clean electricity.

A quick response

Convenience is key, and that's why our Flygt pumps with the Dri-Prime rental add-on kit are available for hire from our strategically located Xylem rental hubs across the UK. Our nationwide presence ensures quick access to these high-performance pumps, no matter where your project is located.

the professional pre-assembly of your potable or wastewater rented system by our experts saves you both time and money. Systems and components from Xylem Rental Solutions are always tailor-made to meet your individual requirements.

This makes for increased operational safety and guarantees that the technology always works under optimal conditions. That's what we call **next-level rental.**

Self priming pumps

The new rental Dri-Prime add on provides the ability to self prime our Flygt Submersibles, ensuring hassle-free setup and operation. This exciting innovation allows you to maximise efficiency and get your pumping tasks up and running swiftly.

A cleaner approach

Our Flygt pumps offer exceptional performance while operating on clean electricity, ensuring a greener and more environmentally friendly approach. With energy efficiency at the core of our design, you can achieve substantial cost savings and reduce your carbon footprint simultaneously.
